Local board

reminds young men to register
The Bulloch County Local Board states that many young men who were serving in the armed forces at the time they were due to register have since been discharged from the service, but have failed to register. Although these young men are not subject to being drafted, they are still obligated to be registered or to re-register within 30 days after discharge from the service.

Under the Selective Service Act of 1948 ALL young men born on or after August 30, 1922, are required to register at their nearest Local Board. Failure to comply with the act by not registering promptly will leave the

For unrestricted and more free city elections

Back in 1912 the Georgia Legislature specified the method of electing the mayor and council of Statesboro. This act read as follows:

"Section 4.—That the general election for mayor and councilmen shall be held on the first Saturday in December, 1912, and on the first Saturday in December thereafter as follows: The first election under the charter to be held on the first Saturday in December, 1912, shall be for the election of the mayor and five councilmen, the mayor and two councilmen to be elected for a period of two years from said date and three of said councilmen to be elected for a period of one year from said date, and until their successors are elected and qualified, after which time the mayor and two councilmen shall be elected biennially and for a period of two years and three of said councilmen shall be elected the year thereafter for a period of two years, so that the terms of the mayor and councilmen shall expire the year thereafter."

Later this act was amended to change the date of our city election but that is not what we are leading up to.

Our understanding of the method of electing our city mayor and city councilmen during these years is that for each election as many candidates as wished could qualify and when the votes cast for each candidate were counted the two candidates receiving the highest number of votes were elected to fill the two vacancies. If it were a year when three councilmen were to be elected then the three candidates receiving the three highest number of votes were the winners.

On December 17, 1948 when the late A. J. Trapnell and A. S. Dodd Jr. were Bulloch county representatives in the Georgia Legislature they introduced a bill which amended our charter which read as follows:

"Section 9.—That the city charter of the City of Statesboro is hereby amended by adding a new section to be known as section 81 and reading as follows:

"Section 81. Be it further enacted that from and after the passage of this act all candidates for election for membership to the City Council of the City of Statesboro shall at the time of his qualification for said

office, ANNOUNCE THE NAME OF THE INCUMBENT AGAINST WHOM HE IS RUNNING, OR THE PARTICULAR SEAT ON SAID CITY COUNCIL WHICH HE SEEKS TO FILL, AND SAID CANDIDATE IS HEREBY REQUIRED TO RUN AGAINST A PARTICULAR CHOSEN OPPONENT OR INCUMBENT OR FOR A PARTICULAR SEAT"

Section 10.—That all laws and parts of laws in conflict with the provisions of this act, be and the same are hereby repealed."

The act was approved February 1, 1949.

This sets up the background for what we are about to say. We do not know why this change was made in our election procedure. But to us it seems without reason. It suggests to us that it was passed to limit the field of candidates in our city council elections. It suggests to us that a worthy citizen who might consider becoming a candidate would refrain from becoming one since he would have to pick out a single candidate, either the incumbent or another candidate, against who he must run.

In the past we have heard citizens who considered becoming a candidate say that when they learned that they must say against whom they must run they back away and give up the prospect of offering for election. The prospective candidate refused to run against a certain incumbent "because he is a friend of mine." Adding however that if he could run against the field where the two or three receiving the highest number of votes would be the winners, he would become a candidate.

And that makes sense. In a community like ours where friendships are considered valuable it goes against a man's grain to be put in such a position.

We believe that if our method of election were as it was before the Act of 1949 we would see more worthy citizens become interested in seeking the responsibilities of city government.

We believe our present representatives in the Legislature would be doing our city a great service to introduce a bill at the next session of the Georgia Assembly to amend our charter making our city election more open, more free and unrestricted.

Cast your ballot with firm conviction

Wednesday of next week, November 16, if you are a registered voter and interested in the Welfare of the county of which you are a part, you will go to the polls and cast your vote for the candidate of your choice to fill either county offices.

We often hear it suggested that communities like ours here in Bulloch county are too small for "machine politics" and that when a candidate is elected it represents the real will of the citizens.

That is not necessarily so. Oftentimes it is in small communities like ours that the strongest political machines are built up and operate to the loss of the citizens.

But when the citizens of a community remain independent in their thinking and study the needs of their community and the candidates seeking the official positions from which their community is governed and then exercise their choice, political machines break down and competent officials are placed in responsible positions.

And we are living in times when there is the constant growing need for vigilance on our local government level.

We tend to listen to a candi-

date's plea that he needs the office, his suggestion that the incumbent has been in the office long enough and he should let someone else have it for a while; his idea that a man friendly with the state administration should be elected so that he can get more and more for our community; his argument that his opposition is a crook and a scoundrel.

Pay no attention to such projections. Don't be trapped by them into voting against your own convictions, arrived at by careful consideration.

Granted that in progressive and clean communities like ours here in Bulloch county, there are few, if any, actual political issues. But there are considerations like character, ability, and real desire for community service of candidates which should be examined when you vote for a county official.

So we plead with the registered voters of our county to approach the ballot boxes next Wednesday with prayerful consideration and cast your vote that will keep our community the wonderful place it is in which to live and rear your children and plan your future.

And here's hoping the best candidate wins. The results are in your hands.

4-H HARVEST: CITIZENS OF TOMORROW

National 4-H Club Achievement Day November 12

Thru the F's of Virginia Russell

The night was beautiful, the sky was dotted with stars and the light reflected from the sun via the moon did things—different things, perhaps, to people.

According to ages, experiences, backgrounds, people no doubt reacted to the glory of the night. Buck Finn told of the discussion he and his run-der friend Jim had about the moon, whether it just happened there or whether someone put it there. Young Huck guessed it just happened there, but Jim, who was older, guessed somebody must have put it there. He guessed too, that the moon must have laid the stars. When they saw a star fall Jim would imagine that it had spoiled the neat and had been pushed out.

Well Bulloch county's hear is the Mississippi River's moon, too. The nights we've had here enough to stir up the imaginations of us all. Yet most of us had to confess that with all we've read that scientists think about the moon, we know practically nothing about it.

Truthfully I took inventory of what I don't know, and it is enough to fill the cavity of the sun (if the sun were a cavity). What is so amazing is that I sometimes act more or less like the birds who somehow know when it's time to go south for the winter, or north for the spring. I, too, get out the winter clothes from the moth-balled chest and make proper preparation for winter. Sometimes I react like the bears and sleep through the alarm clock's nasty ringing on a crisp, cold winter morning feeling so pleasantly comfortable.

The Editor's Uneasy Chair

Last Thursday and Friday we were in Augusta together with newspaper people from Georgia, South Carolina and North Carolina, as guests of the U. S. Atomic Energy Commission at a two-day seminar in atomic energy planned as a public service by The Augusta Chronicle and Herald, and arranged by Louis Harris, executive editor of the newspapers, and Gus O. Robinson, assistant to the manager for public relations, Savannah River Operations office, Atomic Energy Commission.

On Thursday we heard lectures by Lewis Harris, deputy manager, Savannah River Operations office, Atomic Energy Commission; D. A. Miller, plant manager of the Savannah River Plant; and Louis H. Roddis Jr., deputy director, Division of Reactor Development, U. S. Atomic Energy Commission, Washington, D. C.

On Friday morning we made a tour of the Savannah River Plant, commonly known as the "H-Bomb Plant," and spent nearly an hour observing a Nuclear Reactor and learning how it operates. We were told that we were the only group of civilians, excluding congressmen and Indian princesses, to be allowed within the thick walls of the building housing the reactor and to inspect the reactor where uranium materials are tested for radioactivity.

Friday afternoon we returned to Augusta to the Bon Air Hotel and heard three more of the AEC officials: Corbin

It Seems To Me

By Max Lockwood

A GEORGIA CRACKER, that's me, and I'm proud of it. My friends in service used to call me Cracker Boy and I, for one, never resented this. I accepted it without argument and felt sorry that they could not claim for themselves the glorious heritage that is mine.

I'm proud of my state and I'll compare it with any other state in our nation, in any field, be it religion, education or science and industry. It's true that we are not all we would be in any field but we can point to our record of achievement and show what we have worked to accomplish.

IN EVERY FIELD of endeavor we in Georgia have given to the nation and the world much which has been adopted by our nation and used to better ourselves and our country.

In agriculture we can point with pride to the first experiment station in America, established in 1783, to guide our farmers in crop production until today we lead the world in production in the field of agriculture and its related movements.

IN 1794 we revolutionized industry with the introduction of the cotton gin. From this invention the direct result has been a stronger, and better America and a happier world. The invention of the cotton gin had more influence on America than did the two world wars.

1819 came and with it the first steamship to cross the Atlantic Ocean, opening up to the world this great land of ours here on the North American continent. Closely following this

in 1834 we got to the world the first iron ship. It is certainly needless to point out the success of these two creations.

THE FIRST Sunday school in America points out how Georgia feels about religion, when in 1786 John Wesley founded the first Sunday School. We were a religious state in the beginning and we are a God-fearing people in Georgia today, pointing with pride to the first baptism in America in Macon, Georgia, in 1540.

We are a tolerant people in Georgia and in 1801 we chose to lead us David Emanuel, the first Jewish Governor in the United States, pointing out to the world our belief in human freedoms.

IN THE FIELD of education and human relations we gave to the United States the first charter state university at Athens, Georgia, on January 27, 1785, and established for our Negroes a school of nursing in 1881. As early as 1832 we had already established the first Negro hospital and Negro asylum in America, and in Macon, Georgia, in 1836 we chartered the first Negro college in the new world.

We showed America how it should be done when we established a birth registration law in 1823. The benefits from this plan have been of greater influence on our culture than one can realize and was an important step toward a better system of record keeping.

IN 1841 GEORGIA gave to the world a discovery to relieve human suffering which is still accepted today as one of the

greatest discoveries of our age, when Dr. Crawford W. Long used anesthesia for the first time.

Yes, I'm proud that I am a Georgian and I'm happy that my state has meant so much to the development of this America. There are many many other accomplishments which the people of Georgia have given to our proud country. The Girl Scouts had their birth in Georgia in 1912. In 1887 we had discovered bauxite ore. In 1902 the first federal penitentiary in America was completed. In Savannah can be found the oldest theatre in continuous operation and in 1932 we printed the first newspaper on pine pulp in the world.

WE WHO LIVE in Georgia have a proud heritage. It is one which has not been easily accomplished and it is one which should not be lightly accepted. We who are citizens of this great state have a share in this America. Our forefathers have contributed much to the development of our land and it is our responsibility to guide our government and to protect the rights and privileges of all our people.

We have a duty to stand and speak for our rights and we must be ever vigilant that some do-good organization traveling under the cover of so called humanitarianism doesn't sneak in and try to destroy our way of life. Don't think that this can't happen here, it can happen here, and unless you the people intervene through your interference and your determination that it won't happen, it will happen and sooner than you think.
